Re: Proposal for Professional Services
Preliminary Assessment Environmental Due Diligence
84 Main Street at Lot 5, Block 7
86 Main Street at Lot 6, Block 7
Borough of Matawan

Dear Mr. Ferrara:

T&M Associates (T&M) has prepared this proposal for your consideration to provide environmental consulting services at the two properties referenced above which are currently improved with residential and commercial/office structures. T&M proposes the following scope of services to be conducted at the properties in support of the pre-purchase environmental due diligence evaluation being conducted by the Borough.

TASK 1. PRELIMINARY ASSESSMENT (N.J.A.C. 7:26E)
T&M will complete separate, stand-alone Preliminary Assessments (PAs) for each of the properties in accordance with the scope of work, research requirements and area of concern (AOC) identification requirements of the New Jersey Department of Environmental Protection’s (NJDEP) Preliminary Assessment (PA) procedure provided at N.J.A.C. 7:26E-3.1.3.2. The PA is the initial environmental assessment procedure required by the NJDEP Green Acres Program, Industrial Site Recovery Program (ISRA), NJ Infrastructure Trust Program and Municipal Open Space Grant Program.

The PA Reports will present the roster, narratives and recommendations for further investigation (as warranted) for the AOCs identified at the properties in accordance with the PA requirements. The purpose of the PA is to identify existing and/or potentially contaminated AOCs that may need to be further investigated prior to acquisition of the Site, and to assist in estimated potential remediation costs for those AOCs found to be contaminated.

TASK 2. GEOPHYSICAL SURVEYS
T&M and subcontractor will perform non-invasive geophysical surveys (GP Surveys) at the properties as an additional service and in support of the PAs being conducted under Task 1. The GP Surveys will be conducted by a professional geophysicist under T&M supervision at the open and accessible areas of the properties using a combination of ground penetrating radar (GPR) and electromagnetic (EM) and metal detection methods. The purpose of the GP Surveys will be to identify and locate any known and/or undocumented underground storage tanks (USTs) at the Site. The GP Surveys will also attempt to identify...
other below grade utility systems (including wells, septic tanks, piping) and areas of buried non-aggregate historic fill material or solid waste and at the properties. The results of the GP Surveys with recommendations for further investigation (if warranted) will be presented as Areas of Concern within the PA reports we are completing under Task 1 of this proposal.

RESPONSIBILITIES OF CLIENT

It is understood that the following items, information and arrangements to be supplied and/or finalized by the Client/Borough of Matawan will be utilized in the scope of services described within this proposal:

1. The Client will provide all information in its possession, custody or control, which may relate to the properties, including survey maps or sketches illustrating the limits and legal boundaries of the properties and copies of any previous environmental assessments and Site Investigation Reports.
2. The Client should provide all available recorded land title records and judicial records for environmental liens or activity and use limitations that may be in force at the properties.
3. The Client will provide all information in their possession that may identify recognized environmental conditions (RECs) and/or Areas of Concern (AOCs) associated with the properties.
4. The Client will be fully responsible for obtaining the necessary authorization to allow T&M, its agents, subcontractors and representatives to have access to the properties and any structures or tenant spaces and structures thereon at reasonable times throughout the term of this agreement.

LIMITATIONS

The scope of services for this proposal will be completed in compliance with the procedures referenced above. The scope of work includes file reviews, historical research and a visual reconnaissance of the properties to identify RECs/AOCs in accordance with the NJDEP TRSR PA Report procedure and the completion of a non-invasive geophysical survey. The scope of services does not include the following:

- Assessment or investigation of the structures at the properties for the presence of any hazardous or regulated building materials including asbestos-containing building material (ACBM), lead-based paint (LBP) or universal waste;
- The acquisition of soil and/or groundwater samples for the purpose of evaluating the potential impairment or contamination of any AOC identified at the Site during completion of the PA;
- Excavation, removal or evaluation of any suspected UST targets or other target areas identified during the GP Survey;
Mayor Altomonte read by title Resolution 18-12-08: Authorizing T&M Associates to Provide Professional Services for the Borough of Matawan’s Asset Management Plan Associated with the American Water Works Association Water Quality and Accountability Act. Councilwoman Gunn made the motion, seconded by Councilwoman Salvatore. Council agreed. Motion passed.
WHEREAS, the Mayor and Council of the Borough of Matawan received the attached scope and fee estimate from T&M Associates for professional services associated with the creation of an Asset Management Plan designed to inspect, maintain, repair and renew the Borough of Matawan’s infrastructure consistent with standards established by the American Water Works Association.

NOW, THEREFORE BE IT RESOLVED the Council of the Borough of Matawan hereby authorizes T&M Associates to create of an Asset Management Plan on behalf of the Borough as required by the Water Quality Accountability Act as detailed in the attached proposal for professional services in an amount not to exceed Thirty Five Thousand Six Hundred Dollars and No Cents ($35,600.00).

BE IT FURTHER RESOLVED that a true certified copy of this Resolution shall be forwarded to the following Borough of Matawan Departments: Administration, Clerk, Finance, Public Works as well as Robert R. Keady, Jr. of T&M Associates.

CERTIFICATION AS TO AVAILABLE FUNDING

I, Monica Antista, Chief Financial Officer of the Borough of Matawan do hereby certify that as of the date of this certification funds are available from the 8-09-55-500-213 Budget of the Borough of Matawan to T&M Associates for professional services associated with the creation of an Asset Management Plan in an amount not to exceed Thirty Five Thousand Six Hundred Dollars and No Cents ($35,600.00).

This certification is based solely on the information encumbered into the financial records of the borough by the appropriate using division as of this date and relies on the completeness of financial records.

Re: Water Quality and Accountability Act
Asset Management Plan
Ssepe and Fee Estimate

Dear Mr. Ferrara:

The scope of this project is to satisfy the Water Quality Accountability Act (WQAA) requirement by creating an asset management plan designed to inspect, maintain, repair, and renew Matawan’s infrastructure consistent with standards established by the American Water Works Association. The WQAA establishes new requirements for public water systems to improve the safety, reliability, and administrative oversight of water infrastructure. It does not specifically target water quality parameters, but rather the infrastructure that delivers and maintains it. The asset management plan’s objective is to protect drinking water and clean water systems by providing for adequate maintenance and operation to meet customer service expectations, as well as comply with applicable permit conditions for the next 10 years. The NJDEP will require an update to the plan every 3 years.

The Act’s directives begin with program development for inspection and maintenance of all water supply and treatment facilities, detailed engineering analysis of asset condition, estimated service lives of water mains, and an infrastructure and rehabilitation replacement program that is consistent with AWWA standards. Minimum requirements of the Asset Management Plan are:

1. A water main renewal program with an appropriate replacement cycle determined by a detailed engineering analysis.
2. A water supply and treatment program designed to inspect, maintain, repair, renew, and upgrade pumps, sources and treatment facilities.
3. Results of water loss audits included in the Capital Improvement Plan (CIP).
4. Dedicated annual funds to address/mediate the highest priority projects in the plan.

The Asset Management plan must assure the NJDEP that there is sufficient investment in and planned maintenance, needed repair, replacement and upgrade of the physical components of a drinking water system.

Effective asset management of a water system also includes:

- Asset inventory.
- Assessment of the current state or condition of the assets.

Le: Louis Ferrara, Borough Administrator
Re: Water Quality and Accountability Act
Asset Management Plan
Scope and Fee Estimate

- Identification and Prioritization of required improvements to reduce failure risks based on service goals.
- Identification of future demand, regulatory requirements and risks within the required plan term.
- Established life cycle costs
- Development of a Capital Improvement Program to prioritize and fund investment.

Our Work Plan and Technical Approach have been specifically structured to create a reliable and accurate asset inventory which will be highly effective for retrieval, use, and updates throughout the project. T&M will meet with Borough staff to review tasks, roles and responsibilities and outline the completion schedule.

T&M staff will inspect the treatment plant and two water storage towers in an effort to develop a capital improvement plan and system condition report. We request copies of any available reference documents, O&M manuals and copies of the last 12 months of operator reports indicating water production, usage and non-revenue water. After gathering data and compiling reports, T&M will interview Borough staff for additional information pertinent to daily operations, maintenance and criticality.

After our kick-off meeting, we will work with the water department to generate the asset inventory. This list is not meant to be a comprehensive list but rather a list of key and critical assets necessary for operations of the water treatment and distribution systems. Such items include well pumps & motors, booster pumps and pressure filters and do not include individual valves within the treatment plant, miscellaneous piping or small equipment that can be repaired or replaced easily. T&M will develop an asset registry for critical equipment in an Excel format using information the Borough already has available in their Check-up Program for Small Systems (CUPSS) system. This assessment will be exclusive of the distribution system which we understand is being completed by Maser. The inventory will include make and model of critical equipment, level of service assessment, criticality assessment including probability of failure & consequence of failure and life cycle costing with a repair/replacement schedule. All equipment will be photographed, given an identification ID and visually assessed. Operator notes will also be included regarding any maintenance issues which could be occurring.

Our field team will be using Survey123 for ArcGIS as the data collection tool as it will enable field staff to capture data using mobile devices that can then be reviewed in Realtime in the office. The Survey123 forms allow to follow strict data validation and controls routines which maintains a high level of data integrity and reducing data entry errors.

From the data generated above, our team will create a long-term funding strategy to support maintenance of the Borough’s assets. That 10-year strategy will include asset prioritization and Life-Cycle Costing to meet or exceed the level of service necessary. The capital improvement plan will include initial installation costs, O&M expenses, rehabilitation and repair costs as well as disposal costs.

Privilege of the Floor

Mayor Altomonte opened the Privilege of the Floor.

Neil Mendelsohn, 97 Broad Street, Matawan. Mr. Mendelsohn inquired on the frequency of Council meetings. He asked Councilman Cannon on his lack of reply to an email as well as a telephone message left with the Clerk, questioning the Clerk’s competency. Councilman Cannon apologized asking how he can help as he and Mr. Mendelsohn had previously spoken. Mr. Mendelsohn had a personal matter but declined to speak privately with Councilman Cannon after his offer to do so. Mr. Mendelsohn asked Council to inquire on the development of an Aberdeen property adjacent to Lake Matawan. Mr. Mendelsohn expressed concern of someone on his property as there were “white dots” along his driveway into Broad Street. An inquiry with the Borough did not reveal any information to his satisfaction. Mr. Ferrara will further investigate. Mr. Mendelsohn remarked on the timeliness of construction inspection asking if he can directly hire the inspector. Mr. Ferrara replied the inspectors do have a weekly timetable, and cannot be directly hired out. Mr. Ferrara stated he had informed Mr. Mendelsohn he was aware of the situation and understood that Mr. Mendelsohn’s contractor was not ready for the inspection. Mr. Mendelsohn disagreed. Mayor Altomonte offered when the contractor is ready for inspection to contact Mr. Ferrara.

Mayor Altomonte requested a motion to close the Privilege of the Floor. Councilwoman Buckel made the motion, seconded by Councilwoman Salvatore. Council agreed. Motion passed.
