### PLASTIC CONTAINERS

Sorting plastic helps produce high-quality recycled products.

Manufacturers print a standard

code (#1-7) on the bottom of every container. ONLY recycle Types #1 and 2 with a 'pourable' neck smaller than the body. No. 1 Polyethylene Terephthalate PET, PETE Soft drink, water, soda bottles or No. 2 High Density Polyethylene HDPE Detergent bottles

## DO NOT Recycle these items: Put in Regular Trash

### Drinking Glasses, Dishware, Windows, Etc

Non-recyclable glass looks different because it's made from different ingredients and has different melting point. If a ceramic mug is put into a furnace with recyclable glass bottles, for instance, it will melt more slowly causing defects in the process.

### Non-Recyclable Plastic Containers, #3 - #7

### Margarine Tub, Diaper Wipes, Take-Out Plastics, Bottle Caps And Straws, Etc

No. 3 Polyvinyl Chloride PVC, V

(Example: Very hard plastic what salad bar containers are made of)

No. 4 Low Density Polyethylene LDPE

(Example: Fresh produce bags, also used in dry cleaning)

No. 5 Polypropylene PP

Example: Bottle caps, drinking straws, yogurt cups)

No. 6 Polystyrene (Example: Styrofoam)

No. 7 Other Ex: Polycarbonate baby bottles.

### Non-Recyclable Plastic Containers #1 - #2

### Plastic Tupperware, With Wrong Size Neck, Plastic Containers

Some plastic containers, even if they have #1 or #2, are made from a different process, and CANNOT be recycled at this time.

If the neck is the same size as the body, throw them in the regular trash, (along with caps, which are made from yet another, harder plastic to withstand twisting/turning).

### Plastic Bags

These clog machines at the processing plants. Reuse if possible.

### Aluminum Foil, Plates, Trays Or Cookware

### Food Stained Pizza Boxes And Waxed Cardboard

### Food Wrappers, Paper Plates And Cups, Napkins, Paper Towels

### Garden Hoses, Christmas String Lights

## NJ's Ban on Plastic Carryout Bags & Polystyrene Foam in Stores, Grocery Stores & Food Service Businesses

### WHAT DO YOU NEED TO KNOW?

Starting May 4, 2022, New Jersey retail stores, grocery stores and food service businesses may not provide or sell single-use plastic carryout bags and polystyrene foam food service products. Single-use paper carryout bags are allowed to be provided or sold, except by grocery stores equal to or larger than 2500 square feet, which may only provide or sell reusable carryout bags. After November 4, 2021, plastic straws may be provided only upon the request of the customer.

### WHAT IS A REUSABLE CARRYOUT BAG?

- Under the law (P.L.2020 c.117), a reusable carryout bag is defined as one that:
1. is made of polypropylene fabric, PET non-woven fabric, nylon, cloth, hemp product, or other washable fabric, and
  2. has stitched handles (either thread or ultrasonic), and
  3. is designed and manufactured for at least 125 reuses.

### WHERE CAN A BUSINESS PURCHASE PRODUCTS ALLOWED UNDER THE LAW?

Businesses may contact any distributor or manufacturer to obtain products that meet the requirements of the law. As a courtesy, the NJ Business Action Center's website will soon feature an online clearinghouse of wholesale vendors who provide environmentally-sound alternative products. Please check [business.nj.gov](https://business.nj.gov) for updates.

### WHAT POLYSTYRENE FOAM FOOD SERVICE PRODUCTS ARE BANNED?

As of May 4, 2022, all polystyrene foam food service products are banned for use and sale. See below for a list of exemptions. For more information, please see [nj.gov/dep/plastic-ban-law/#foam\\_products](https://nj.gov/dep/plastic-ban-law/#foam_products)

### WHAT RETAIL AND FOOD SERVICE ESTABLISHMENTS ARE AFFECTED BY THIS BAN?

For a list of businesses impacted and items banned please go to this link: <https://nj.gov/dep/plastic-ban-law/docs/list-of-establishments-banned-items.pdf>

### EXEMPTIONS TO THE BAN

See lists of exemptions below. The Department of Environmental Protection (DEP) has the ability to determine additional exemptions pursuant to rule, regulation, or guidance. For more information, please see the DEP's website at [nj.gov/dep/plastic-ban-law](https://nj.gov/dep/plastic-ban-law)

### WAIVERS FOR POLYSTYRENE FOAM FOOD SERVICE PRODUCTS

The DEP may, upon written application by a person or food service business, waive the provisions of the polystyrene foam food service product ban for the person or food service business for a period not to exceed one year, if:

- (1) there is no feasible and commercially available alternative for a specific polystyrene foam food service product; or
- (2) the person or food service business has less than \$500,000 in gross annual income and there is no reasonably affordable, commercially-available alternative to the polystyrene foam food service product.

For further information on obtaining a waiver, please see the DEP's website at [NJ.gov/dep/plastic-ban-law/](https://nj.gov/dep/plastic-ban-law/). The DEP may be contacted via email: [singleuseplastics@dep.nj.gov](mailto:singleuseplastics@dep.nj.gov) or phone: +1(609)-984-4250.

## Tackling the Litter Problem

**What is litter?** Litter is solid waste that's out of place. It's the kind of trash found on highways, lake fronts, parks and school grounds. Litter takes many forms: paper, plastics, metal cans, cigarette butts, glass, food packaging, tires and graffiti.

**Where does it come from?** There are five sources of litter: pedestrians, motorists, overflowing household garbage, construction sites and uncovered trucks. Litter is often blown by the wind until it is trapped somewhere, as along a fence.

**Why do people litter?** People tend to litter when they think someone else will clean up, when an area is already littered, and when they do not feel a sense of ownership or community pride.

**Why is litter a problem?** Even small amounts of litter are unsightly, unhealthy and dangerous. Litter causes blighted landscapes resulting in an increase in taxes and a decrease in tourism and industry; loss of civic pride and morale; and a negative public image. Litter can also cause disease in people and animals, fires, and accidents, especially on roadways.

## DE-ICING OPERATIONS AND SNOW REMOVAL FROM ROADS

The Matawan Department of Public Works is solely responsible for de-icing operations and snow removal from Matawan roads. The department does have an adequate amount of equipment and manpower to address the most significant storms.

Our residents can help us do a better job by following these simple guidelines before, during, and after a storm:

- Please make sure all of your vehicles have been removed from borough streets before the storm. Plowing does not typically begin until there is about 4 inches of accumulated snow, but salting operations will start once the snow begins to fall.
- After the snow has stopped, the plows will open the roads curb-to-curb. **Residents should wait for the department to completely clear the streets, before clearing snow from the head of driveways, or sidewalks.**
- Make sure your children and pets are kept well away from any snow clearing operations.

## Composting IS Recycling

Composting is when you separate out your kitchen vegetables and yard waste at home, and place it into a special pile so that it breaks down into a natural, soil-like product that can be used as fertilizer.

ABOVE; LEFT and RIGHT: Two styles of composting bins.

### STEP 1: Choose the Right Materials

- Vegetable & Fruit Scraps
  - Tea Bags
  - Coffee Grounds & Filters
  - Egg shells
  - Peanut and Nut Shells
  - Sawdust
  - Dust/Lint
  - Nail Clippings
  - Human Hair
  - Hay/Straw
  - Feathers
  - Paper
  - Weeds \*
  - Fabrics (cotton, silk)
  - Bark
  - Wood Ashes
  - Corn Cobs
  - Horse/Chicken/Cow Manure
  - Leaves (save in fall for spring!)
  - Garden Clippings
  - Stalks and Stems
  - Vines
  - Grass
- \*No aggressive weeds or weeds gone to seed

**DO NOT Compost:** Meat/Poultry/Fish • Fats/Oils • Bones • Dairy Products • Plastics or Synthetic Fibers • Pet Waste (meat eating pets) **IN GENERAL, NO ANIMAL PRODUCTS OR DAIRY**

### STEP 2: Select & Prepare a Site -

- Choose a place in your yard that is convenient (sunny or shady will do) and fashion some type of area or enclosure for your pile
- Assemble wooden stakes and/or chicken wire into a simple round enclosure.
  - Construct a wooden compost bin (use old lumber, if you have any)
  - Build a 3-sided enclosure with cinder blocks. Leave the front open.
  - Purchase a ready-made bin from a home center or garden supplier.
  - Or you can opt for no enclosure; just pile the materials up, keeping them in a fairly dense heap.

### STEP 3: Add Your Compost Materials

- Layer dry (leaves), and moist (grass, kitchen scraps) in a 1:1 ratio.
- Add enough water to keep the compost heap moist, but not soggy.
- Provide adequate ventilation. To increase air circulation, turn the compost with a pitchfork at least once a month (helpful but not absolutely necessary). You can also push rods or poles through the heap and then remove them, leaving channels through which air can pass, or insert hollow, perforated poles.
- As the compost materials decompose, they create heat. This is natural, and when the pile is turned, you will be able to feel the heat.
- If your compost pile is properly prepared, contains no animal fats and is turned regularly, it will not attract pests or create odors.

# Is your dog green?

Storm drains can be found on streets throughout the town. They collect rain water and prevent flooding when it rains. These drains empty directly into the nearest water body, usually a stream or river, **without treatment of the water.** This means that dog waste and other pollutants left on a lawn, on the street, or placed in storm drains, will get washed into our rivers and watersheds when rain falls. Our rivers and streams are areas of recreational swimming, boating and fishing and contribute to our drinking water sources.

**Let's remove dog waste from the water pollution equation! Scooping your pooch's poop isn't just a courtesy, it's the law. Borough of Matawan Code Book, Chapter 5, Section 5-6e.**

**Just one dog? A day's waste from one large dog can contain 7.8 million fecal coliform bacteria.**

## Here's how to remove dog waste from the water pollution equation:

**BRING IT**—Always bring a plastic bag when you walk your dog. So that you're never without, carry grocery or newspaper bags in your purse, pocket or car.

**BAG IT**—Use the bag as a glove to pick up pet waste. Scoop up the waste and turn the bag inside out around the waste.

**DISPOSE IT!**—Properly dispose of pet waste by placing it in a trash can or flushing it, unbagged, down the toilet.

Rain washes pollutants into storm drains and directly into our lakes, rivers, and the ocean

Why is dog waste a problem? *Scientific evidence has shown dog waste to be a significant source of water pollution because it contains a high concentration of nutrients as well as bacteria and disease-causing microorganisms.*

**Your Health**—Leaving pet waste on the ground may pose a risk to children and adults who can be exposed to various diseases spread by feces.

**Your Water**—Pet waste carries disease causing organisms such as giardia and salmonella, which can make water unsafe for drinking or swimming.

**Your Community**—Swimming beaches and boating areas can be shut down due to bacterial contamination, of which pet waste can be the source.

## WHAT IS STORM WATER POLLUTION?

Water from rain and melting snow that flows over lawns, parking lots and streets is known as storm water runoff. This water, which travels along gutters, into catch basins and through storm drain pipes and ditches, usually is not treated, but then flows or is discharged into local water bodies. Along the way, the storm water picks up trash (fast-food wrappers, cigarette butts, styrofoam cups, etc.) and toxins and other pollutants (gas, motor oil, antifreeze, fertilizers, pesticides and pet droppings). This polluted storm water can kill fish and other wildlife, destroy wildlife habitat, contaminate drinking water sources and force the closing of beaches because of health threats to swimmers.

Human activity is largely responsible for the storm water pollution. Everything that we put on the ground or into the storm drain can end up in our water. Each of us has a responsibility to make sure these contaminants stay out of our water. Whether we have clean water is up to you.

# Grass – Cut It and Leave It

## Environmentally-Friendly Lawn Care

Grass clippings are a major part of New Jersey's municipal solid waste stream. As a New Jersey resident, you are already helping to avoid air pollution and wasted resources by recycling. You can do more by reducing waste at the source. Leave the grass clippings on your lawn when you mow, and let nature do the recycling.

**Just cut it and leave it to save time and money**

You'll save 20-25% of your time because you won't have to stop and empty your lawn mower bag, and you'll avoid purchasing yard waste bags and hauling them to the curb. You'll need to fertilize less (25-50%), since clippings return nutrients to the soil.

**Mow your lawn correctly**

To maintain your lawn properly, mow high and mow often, so that you only take off about 1/3 of the length of the grass. This will result in an attractive, neatly trimmed lawn, and clippings will disappear when they filter down to the soil. Most New Jersey lawns should be mowed 2 1/2 - 3 1/2 inches high (like the rough beside a golf course fairway), especially in summer, to shade the soil, cool the roots, and block weed growth. Mulching mowers help you do this; they chop the clippings into fine pieces that slip easily down to the soil. Most new mowers are mulching mowers, and you can attach mulching equipment to your existing mower.

**The right amount of water**

Controlling watering rates will help your lawn grow at manageable levels and still stay healthy. Don't water until the lawn is dry. If it turns blue-green or gray, or if footprints don't spring back, it's time to water.

Provide about an inch at a time for clay soil, and half an inch for sandy soil. Place a few cans around the lawn and note how long it takes for that much water to collect. Even in dry periods, lawns usually need a thorough watering only once a week, or twice if soils are sandy. If managed carefully, water will soak the soil four to six inches down, just right for building healthy root systems and greener growth. Early morning watering conserves water by preventing evaporation.

**What to do with excessive growth**

If you miss a week, or if heavy rain causes fast growth, you have some choices.

**Double mow**

Set the mower higher than usual and cut no more than the top third of the grass. In a day or two, set the mower height down and bring the lawn mower down another 1/3 of its height. Continue this process until you reach the desired height.

**Mulch heavy clippings into the garden**

Bag or rake the clippings and apply them to your garden as mulch. Spread them an inch deep, to cool the soil, retain water, prevent erosion and compaction, and smother weed seeds.

**Mix them with the soil**

New Jersey soils can be improved by adding organic matter. Added organic materials make heavy clay soils become more productive, and sandy soils retain more water.

**Compost**  
Grass speeds up your composting, but can cause odors and deplete oxygen if not properly managed. If you compost large amounts of grass, turn the pile often with a pitchfork.

**What about thatch?**

Clippings don't cause thatch. Thatch is formed from the accumulation of dead roots and stems. The more you fertilize and water your lawn, the more it grows and the faster thatch accumulates.

**Lawn additives**

Many people apply too many lawn products, too often. It costs money and may harm the lawn. Better to evaluate problems and apply only what you need. Let your County Agriculture Extension Agents give you expert advice on care and disease treatment. You can find lawn care publication at www.rce.rutgers.edu/.

Every year in New Jersey, dozens of people poison themselves taking care of their own lawns because they don't take product label warnings seriously, and they think that more is better. Lawn additives are powerful chemicals, and you need to use them correctly.

**Fertilizer**

Too much fertilizer means rapid growth and more mowing. Use soil testing to verify the need for fertilizer, see your County Extension Office for a soil test kit. Fertilize in September and again in October or November for a healthier lawn. This keeps the lawn greener through the winter and strengthens roots for thick growth in the spring without the unwanted long growth caused by spring fertilization. This means fewer mowings, less clippings, and less work. Don't fertilize in summer unless needed; too much can kill cool-season grasses such as fine fescues! Use fertilizer containing at least 50% controlled release nitrogen. The bag may say "water insoluble or WIN," "organic," or "slow release" nitrogen.

**Herbicides and insecticides**

Herbicides remain on the grass for some time, and some make the clippings unsuitable for mulch, so it's important to cut it and leave it when you use weed killers. Too much herbicide can burn the lawn, kill nearby plants, and contaminate waterways. Instead of repeated whole-lawn application of weed killers, try a one-time pre-emergent weed killer and spot application if your lawn has only a few weeds. If you see signs of insect damage, call your extension agent to determine what you need before you select an insecticide. You may find that you don't need any at all.

You can achieve the lawn you want and also protect our environment, when you practice careful turf management, and **Cut It and Leave It!**
